Converting from special purpose to general purpose financial statements

Converting from special purpose to general purpose financial statements

This publication is a complimentary resource provided by Accurri Pty Limited and its related entities and is intended to assist those who are converting from special purpose to general purpose financial statements.

If you are reading a printed version of this publication, please visit accurri.com/resources to make certain that it is the most up-to-date version.

Introduction

Trying to understand the difference between special purpose and general purpose financial statements can be a challenge. One way of coming to grips with the challenge is to study illustrated or model examples of each and note the difference.

Accurri Example Financial Statements are an invaluable statutory accounts production resource. Available in PDF and Word formats, the Example Financial Statements are updated to reflect the International Financial Reporting Standards (IFRS) as at 30 June (Australia) and 31 December (all regions) each year.

These practical and clear examples are complimentary, cover a wide range of reporting scenarios and can be used with ease and confidence. You can subscribe to this resource using the following link https://accurri.com/examples.

Whilst model and example financial statements can be very helpful, they are like a map that shows only the destination (or end result). They will clearly show the difference between special purpose and general purpose financial statements, but what they can't do is explain how to convert from special purpose to general purpose financial statements.

Accordingly this booklet seeks to fill in that gap and provide a step-by-step guide to the conversion process.

Users of Accurri financial reporting software (the software) do not need to read this booklet. To convert a report in the software simply change the Reporting Option 'Basis of Preparation' to a 'general purpose' selection. The software will do the rest.

We acknowledge that this booklet is written from our point of view, which is just one of many. However after many years, and many hundreds of financial statements converted, we know our process works and we are proud to share it.

If you would like to comment on, add to, or even challenge anything in this booklet, please email us at support@accurri.com.

Additional general purpose disclosures

Directors' report

The directors' report disclosures between special purpose and general purpose remain the same, as the directors' report is governed by the Corporations Act 2001 not the Accounting Standards.

Financial statements

The recognition and measurement requirements of special purpose and general purpose financial statements are the same, it is only the disclosure requirements that differ.

The disclosure requirements for special purpose are significantly diluted. Special purpose only needs to comply with the disclosure requirements of:

- AASB 101 'Presentation of Financial Statements'
- AASB 107 'Statement of Cash Flows'
- AASB 108 'Accounting Policies, Changes in Accounting Estimates and Errors'
- AASB 1048 'Interpretation of Standards'
- AASB 1054 'Australian Additional Disclosures'

and the requirements of the ASIC Corporations Instruments:

- 2016/191 'Rounding in financial/directors' reports'
- 2016/785 'Wholly-owned companies' ('Deed of cross guarantee')

We note that some preparers of special purpose financial statements have, on occasions, elected to 'over disclose', with a typical example being disclosure of plant and equipment reconciliation in accordance with AASB 116.

However, for the purposes of this booklet, we have assumed that the original special purpose financial statements (the one to be converted) complied with only the minimum disclosure requirements.

For those who wish to convert from special purpose to reduced disclosure requirements (RDR) general purpose, please refer to the Accurri booklet titled Converting from special purpose to RDR general purpose financial statements available at: https://accurri.com/resources.

Key additional disclosures

In summary, the key additional disclosures in the notes to the financial statements for general purpose financial statements are:

- Income tax breakdowns (income tax expense, deferred tax asset and deferred tax liability)
- Impairment of receivables
- Reconciliations (such as plant and equipment, intangibles and provisions)
- Intangibles impairment testing
- Provisions descriptions
- Borrowings information (total secured liabilities, assets pledged as security and financing arrangements)
- Capital risk management
- Financial instruments
- Fair value measurement
- Key management personnel disclosures
- Contingent assets
- Contingent liabilities
- Commitments
- Related party transactions
- Business combinations
- Interests in subsidiaries
- Interests in associates
- Share-based payments

Assumptions and conventions used in the example

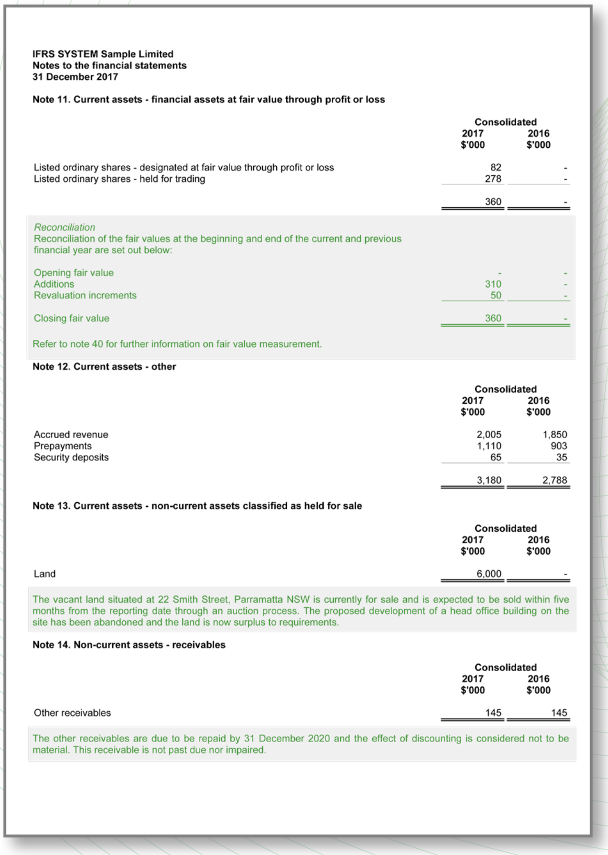
Assumption

As mentioned earlier, the example in the following pages assumes that the original special purpose financial statements (the one to be converted) complied with only the minimum disclosure requirements.

Conventions

For illustrative purposes the conventions that apply to the following example are:

- Content that formed part of the original special purpose financial statements and that remains unchanged, is presented as black text on a clear background
- Content that has been edited as a result of converting from special purpose to general purpose is presented as green text on a clear background
- The cover page and the placeholder pages reserved for the auditor's independence declaration and the independent auditor's report have been intentionally omitted
- Additional content required in the general purpose financial statements is presented as green text on a grey shaded background (as in the diagram below)



IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 11. Current assets - financial assets at fair value through profit or loss

	Consolidated 2017 $'000	Consolidated 2016 $'000
Listed ordinary shares - designated at fair value through profit or loss	82	-
Listed ordinary shares - held for trading	278	-
	360	-

Reconciliation
Reconciliation of the fair values at the beginning and end of the current and previous financial year are set out below:

	2017 $'000	2016 $'000
Opening fair value	-	-
Additions	310	-
Revaluation increments	50	-
Closing fair value	360	-

Refer to note 40 for further information on fair value measurement.

Note 12. Current assets - other

	Consolidated 2017 $'000	Consolidated 2016 $'000
Accrued revenue	2,005	1,850
Prepayments	1,110	903
Security deposits	65	35
	3,180	2,788

Note 13. Current assets - non-current assets classified as held for sale

	Consolidated 2017 $'000	Consolidated 2016 $'000
Land	6,000	-

The vacant land situated at 22 Smith Street, Parramatta NSW is currently for sale and is expected to be sold within five months from the reporting date through an auction process. The proposed development of a head office building on the site has been abandoned and the land is now surplus to requirements.

Note 14. Non-current assets - receivables

	Consolidated 2017 $'000	Consolidated 2016 $'000
Other receivables	145	145

The other receivables are due to be repaid by 31 December 2020 and the effect of discounting is considered not to be material. This receivable is not past due nor impaired.

IFRS SYSTEM Sample Limited
Directors' report
31 December 2017

The directors present their report, together with the financial statements, on the consolidated entity (referred to hereafter as the 'consolidated entity') consisting of IFRS SYSTEM Sample Limited (referred to hereafter as the 'company' or 'parent entity') and the entities it controlled at the end of, or during, the year ended 31 December 2017.

Directors
The following persons were directors of IFRS SYSTEM Sample Limited during the whole of the financial year and up to the date of this report, unless otherwise stated:

Anthony Example
Brad Example
Christina Example
Daniel Example
Elizabeth Example (resigned on 19 February 2018)

Principal activities
During the financial year the principal continuing activities of the consolidated entity consisted of:
- Computer manufacturing
- Computer retailing
- Computer distribution

The computer distribution division was significantly enhanced during the year with the acquisition of CompCarrier Pty Limited.

Dividends
Dividends paid during the financial year were as follows:

	Consolidated	
	2017 $'000	**2016 $'000**
Final dividend for the year ended 31 December 2016 (2016: 31 December 2015) of 15 cents (2016: 8 cents) per ordinary share	22,037	11,744
Interim dividend for the year ended 31 December 2017 (2016: 31 December 2016) of 5 cents (2016: 4 cents) per ordinary share	7,346	5,872
	29,383	17,616

On [date] the directors declared a final dividend for the year ended 31 December 2017 of 17 cents per ordinary share to be paid on [date], a total estimated distribution of $24,975,000 based on the number of ordinary shares on issue as at [date]. As the dividend was fully franked, there are no income tax consequences for the owners of IFRS SYSTEM Sample Limited relating to this dividend.

Review of operations
The profit for the consolidated entity after providing for income tax and non-controlling interest amounted to $32,408,000 (31 December 2016: $21,620,000).

All three of the consolidated entity's divisions improved their profit results. The computer manufacturing division further increased its profit following the re-engineering of its processes, which has resulted in increased production and a reduction in product defects. The computer retailing division had a 7.2% increase in sales largely from higher value products. The computer distribution division benefited greatly from the final integration of the acquired CompCarrier business, which saw its existing administrative function better utilised.

The financial position of the consolidated entity is very strong with excellent liquidity and a large asset base, which is being fully utilised. With the predicted upturn in the economy and continued profitability of the consolidated entity, bank borrowings are expected to reduce significantly during the year ending 31 December 2018 from current cash on deposit and future earnings, without necessarily reducing dividend payments.

IFRS SYSTEM Sample Limited
Directors' report
31 December 2017

The computer industry is a fast moving industry and the rate of technological change is astronomical. The main risk for the consolidated entity, and therefore the focus of management, is inventory management. During the financial year the inventory module of the management information system was updated to provide 'real time' information on stock turn and the identification of slow moving inventory. This allows management to make special offers to customers to clear the inventory before it becomes completely obsolete.

Significant changes in the state of affairs
On [date] Delserve Pty Limited, a subsidiary of IFRS SYSTEM Sample Limited, acquired 100% of the ordinary shares of CompCarrier Pty Limited (formerly known as TechCarrier Pty Limited) for the total consideration transferred of $8,230,000. This is a freight business and operates in the computer distribution division of the consolidated entity.

There were no other significant changes in the state of affairs of the consolidated entity during the financial year.

Matters subsequent to the end of the financial year
Apart from the dividend declared as discussed above, no other matter or circumstance has arisen since 31 December 2017 that has significantly affected, or may significantly affect the consolidated entity's operations, the results of those operations, or the consolidated entity's state of affairs in future financial years.

Likely developments and expected results of operations
Information on likely developments in the operations of the consolidated entity and the expected results of operations have not been included in this report because the directors believe it would be likely to result in unreasonable prejudice to the consolidated entity.

Environmental regulation
The consolidated entity is not subject to any significant environmental regulation under Australian Commonwealth or State law.

Shares under option
Unissued ordinary shares of IFRS SYSTEM Sample Limited under option at the date of this report are as follows:

Grant date	Expiry date	Exercise price	Number under option
[date]	[date]	$3.00	17,500

No person entitled to exercise the options had or has any right by virtue of the option to participate in any share issue of the company or of any other body corporate.

Shares issued on the exercise of options
The following ordinary shares of IFRS SYSTEM Sample Limited were issued during the year ended 31 December 2017 and up to the date of this report on the exercise of options granted:

Date options granted	Exercise price	Number of shares issued
[date]	$2.50	10,000

Indemnity and insurance of officers
The company has indemnified the directors and executives of the company for costs incurred, in their capacity as a director or executive, for which they may be held personally liable, except where there is a lack of good faith.

During the financial year, the company paid a premium in respect of a contract to insure the directors and executives of the company against a liability to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

Indemnity and insurance of auditor
The company has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the company or any related entity against a liability incurred by the auditor.

During the financial year, the company has not paid a premium in respect of a contract to insure the auditor of the company or any related entity.

IFRS SYSTEM Sample Limited
Directors' report
31 December 2017

Proceedings on behalf of the company
No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the company, or to intervene in any proceedings to which the company is a party for the purpose of taking responsibility on behalf of the company for all or part of those proceedings.

Rounding of amounts
The company is of a kind referred to in Corporations Instrument 2016/191, issued by the Australian Securities and Investments Commission, relating to 'rounding-off'. Amounts in this report have been rounded off in accordance with that Corporations Instrument to the nearest thousand dollars, or in certain cases, the nearest dollar.

Auditor's independence declaration
A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out immediately after this directors' report.

This report is made in accordance with a resolution of directors, pursuant to section 298(2)(a) of the Corporations Act 2001.

On behalf of the directors

Daniel Example
Director

IFRS SYSTEM Sample Limited
Contents
31 December 2017

General information

The financial statements cover IFRS SYSTEM Sample Limited as a consolidated entity consisting of IFRS SYSTEM Sample Limited and the entities it controlled at the end of, or during, the year. The financial statements are presented in Australian dollars, which is IFRS SYSTEM Sample Limited's functional and presentation currency.

IFRS SYSTEM Sample Limited is a company limited by shares, incorporated and domiciled in Australia. Its registered office and principal place of business are:

Registered office	**Principal place of business**
10th Floor Universal Administration Building 12 Highland Street Sydney NSW 2000	5th Floor Apex Business Centre 247 Edward Street Brisbane QLD 4000

A description of the nature of the consolidated entity's operations and its principal activities are included in the directors' report, which is not part of the financial statements.

The financial statements were authorised for issue, in accordance with a resolution of directors, on 23 February 2018. The directors have the power to amend and reissue the financial statements.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies

The principal accounting policies adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

New or amended Accounting Standards and Interpretations adopted
The consolidated entity has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

Basis of preparation
These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') and the Corporations Act 2001, as appropriate for for-profit oriented entities. These financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board ('IASB').

Historical cost convention
The financial statements have been prepared under the historical cost convention, except for, where applicable, the revaluation of available-for-sale financial assets, financial assets and liabilities at fair value through profit or loss, investment properties, certain classes of property, plant and equipment and derivative financial instruments.

Critical accounting estimates
The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the consolidated entity's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 2.

Parent entity information
In accordance with the Corporations Act 2001, these financial statements present the results of the consolidated entity only. Supplementary information about the parent entity is disclosed in note 47.

Principles of consolidation
The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of IFRS SYSTEM Sample Limited ('company' or 'parent entity') as at 31 December 2017 and the results of all subsidiaries for the year then ended. IFRS SYSTEM Sample Limited and its subsidiaries together are referred to in these financial statements as the 'consolidated entity'.

Subsidiaries are all those entities over which the consolidated entity has control. The consolidated entity controls an entity when the consolidated entity is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the consolidated entity. They are de-consolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between entities in the consolidated entity are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the consolidated entity.

The acquisition of subsidiaries is accounted for using the acquisition method of accounting. A change in ownership interest, without the loss of control, is accounted for as an equity transaction, where the difference between the consideration transferred and the book value of the share of the non-controlling interest acquired is recognised directly in equity attributable to the parent.

Non-controlling interest in the results and equity of subsidiaries are shown separately in the statement of profit or loss and other comprehensive income, statement of financial position and statement of changes in equity of the consolidated entity. Losses incurred by the consolidated entity are attributed to the non-controlling interest in full, even if that results in a deficit balance.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies (continued)

Where the consolidated entity loses control over a subsidiary, it derecognises the assets including goodwill, liabilities and non-controlling interest in the subsidiary together with any cumulative translation differences recognised in equity. The consolidated entity recognises the fair value of the consideration received and the fair value of any investment retained together with any gain or loss in profit or loss.

Foreign currency translation
The financial statements are presented in Australian dollars, which is IFRS SYSTEM Sample Limited's functional and presentation currency.

Foreign currency transactions
Foreign currency transactions are translated into Australian dollars using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Foreign operations
The assets and liabilities of foreign operations are translated into Australian dollars using the exchange rates at the reporting date. The revenues and expenses of foreign operations are translated into Australian dollars using the average exchange rates, which approximate the rates at the dates of the transactions, for the period. All resulting foreign exchange differences are recognised in other comprehensive income through the foreign currency reserve in equity.

The foreign currency reserve is recognised in profit or loss when the foreign operation or net investment is disposed of.

Revenue recognition
Revenue is recognised when it is probable that the economic benefit will flow to the consolidated entity and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable.

Sale of goods
Sale of goods revenue is recognised at the point of sale, which is where the customer has taken delivery of the goods, the risks and rewards are transferred to the customer and there is a valid sales contract. Amounts disclosed as revenue are net of sales returns and trade discounts.

Rendering of services
Rendering of services revenue from computer maintenance fees is recognised by reference to the stage of completion of the contracts.

Stage of completion is measured by reference to labour hours incurred to date as a percentage of total estimated labour hours for each contract. Where the contract outcome cannot be reliably estimated, revenue is only recognised to the extent of the recoverable costs incurred to date.

Interest
Interest revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

Rent
Rent revenue from investment properties is recognised on a straight-line basis over the lease term. Lease incentives granted are recognised as part of the rental revenue. Contingent rentals are recognised as income in the period when earned.

Other revenue
Other revenue is recognised when it is received or when the right to receive payment is established.

Income tax
The income tax expense or benefit for the period is the tax payable on that period's taxable income based on the applicable income tax rate for each jurisdiction, adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognised for prior periods, where applicable.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies (continued)

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to be applied when the assets are recovered or liabilities are settled, based on those tax rates that are enacted or substantively enacted, except for:

- When the deferred income tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting nor taxable profits; or
- When the taxable temporary difference is associated with interests in subsidiaries, associates or joint ventures, and the timing of the reversal can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The carrying amount of recognised and unrecognised deferred tax assets are reviewed at each reporting date. Deferred tax assets recognised are reduced to the extent that it is no longer probable that future taxable profits will be available for the carrying amount to be recovered. Previously unrecognised deferred tax assets are recognised to the extent that it is probable that there are future taxable profits available to recover the asset.

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entities which intend to settle simultaneously.

IFRS SYSTEM Sample Limited (the 'head entity') and its wholly-owned Australian subsidiaries have formed an income tax consolidated group under the tax consolidation regime. The head entity and each subsidiary in the tax consolidated group continue to account for their own current and deferred tax amounts. The tax consolidated group has applied the 'separate taxpayer within group' approach in determining the appropriate amount of taxes to allocate to members of the tax consolidated group.

In addition to its own current and deferred tax amounts, the head entity also recognises the current tax liabilities (or assets) and the deferred tax assets arising from unused tax losses and unused tax credits assumed from each subsidiary in the tax consolidated group.

Assets or liabilities arising under tax funding agreements with the tax consolidated entities are recognised as amounts receivable from or payable to other entities in the tax consolidated group. The tax funding arrangement ensures that the intercompany charge equals the current tax liability or benefit of each tax consolidated group member, resulting in neither a contribution by the head entity to the subsidiaries nor a distribution by the subsidiaries to the head entity.

Current and non-current classification
Assets and liabilities are presented in the statement of financial position based on current and non-current classification.

An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in the consolidated entity's normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

A liability is classified as current when: it is either expected to be settled in the consolidated entity's normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are always classified as non-current.

Cash and cash equivalents
Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. For the statement of cash flows presentation purposes, cash and cash equivalents also includes bank overdrafts, which are shown within borrowings in current liabilities on the statement of financial position.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies (continued)

Trade and other receivables
Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any provision for impairment. Trade receivables are generally due for settlement within 30 days.

Collectability of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectable are written off by reducing the carrying amount directly. A provision for impairment of trade receivables is raised when there is objective evidence that the consolidated entity will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments (more than 60 days overdue) are considered indicators that the trade receivable may be impaired. The amount of the impairment allowance is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial.

Other receivables are recognised at amortised cost, less any provision for impairment.

Inventories
Raw materials, work in progress and finished goods are stated at the lower of cost and net realisable value on a 'first in first out' basis. Cost comprises of direct materials and delivery costs, direct labour, import duties and other taxes, an appropriate proportion of variable and fixed overhead expenditure based on normal operating capacity, and, where applicable, transfers from cash flow hedging reserves in equity. Costs of purchased inventory are determined after deducting rebates and discounts received or receivable.

Stock in transit is stated at the lower of cost and net realisable value. Cost comprises of purchase and delivery costs, net of rebates and discounts received or receivable.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Derivative financial instruments
Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

Cash flow hedges
Cash flow hedges are used to cover the consolidated entity's exposure to variability in cash flows that is attributable to particular risks associated with a recognised asset or liability or a firm commitment which could affect profit or loss. The effective portion of the gain or loss on the hedging instrument is recognised in other comprehensive income through the cash flow hedges reserve in equity, whilst the ineffective portion is recognised in profit or loss. Amounts taken to equity are transferred out of equity and included in the measurement of the hedged transaction when the forecast transaction occurs.

Cash flow hedges are tested for effectiveness on a regular basis both retrospectively and prospectively to ensure that each hedge is highly effective and continues to be designated as a cash flow hedge. If the forecast transaction is no longer expected to occur, the amounts recognised in equity are transferred to profit or loss.

If the hedging instrument is sold, terminated, expires, exercised without replacement or rollover, or if the hedge becomes ineffective and is no longer a designated hedge, the amounts previously recognised in equity remain in equity until the forecast transaction occurs.

Non-current assets or disposal groups classified as held for sale
Non-current assets and assets of disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continued use. They are measured at the lower of their carrying amount and fair value less costs of disposal. For non-current assets or assets of disposal groups to be classified as held for sale, they must be available for immediate sale in their present condition and their sale must be highly probable.

An impairment loss is recognised for any initial or subsequent write down of the non-current assets and assets of disposal groups to fair value less costs of disposal. A gain is recognised for any subsequent increases in fair value less costs of disposal of a non-current assets and assets of disposal groups, but not in excess of any cumulative impairment loss previously recognised.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies (continued)

Non-current assets are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of assets held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of disposal groups classified as held for sale are presented separately on the face of the statement of financial position, in current assets. The liabilities of disposal groups classified as held for sale are presented separately on the face of the statement of financial position, in current liabilities.

Associates
Associates are entities over which the consolidated entity has significant influence but not control or joint control. Investments in associates are accounted for using the equity method. Under the equity method, the share of the profits or losses of the associate is recognised in profit or loss and the share of the movements in equity is recognised in other comprehensive income. Investments in associates are carried in the statement of financial position at cost plus post-acquisition changes in the consolidated entity's share of net assets of the associate. Goodwill relating to the associate is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment. Dividends received or receivable from associates reduce the carrying amount of the investment.

When the consolidated entity's share of losses in an associate equals or exceeds its interest in the associate, including any unsecured long-term receivables, the consolidated entity does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

The consolidated entity discontinues the use of the equity method upon the loss of significant influence over the associate and recognises any retained investment at its fair value. Any difference between the associate's carrying amount, fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

Investments and other financial assets
Investments and other financial assets are initially measured at fair value. Transaction costs are included as part of the initial measurement, except for financial assets at fair value through profit or loss. They are subsequently measured at either amortised cost or fair value depending on their classification. Classification is determined based on the purpose of the acquisition and subsequent reclassification to other categories is restricted.

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the consolidated entity has transferred substantially all the risks and rewards of ownership.

Financial assets at fair value through profit or loss
Financial assets at fair value through profit or loss are either: (i) held for trading, where they are acquired for the purpose of selling in the short-term with an intention of making a profit; or (ii) designated as such upon initial recognition, where they are managed on a fair value basis or to eliminate or significantly reduce an accounting mismatch. Except for effective hedging instruments, derivatives are also categorised as fair value through profit or loss. Fair value movements are recognised in profit or loss.

Available-for-sale financial assets
Available-for-sale financial assets are non-derivative financial assets, principally equity securities, that are either designated as available-for-sale or not classified as any other category. After initial recognition, fair value movements are recognised in other comprehensive income through the available-for-sale reserve in equity. Cumulative gain or loss previously reported in the available-for-sale reserve is recognised in profit or loss when the asset is derecognised or impaired.

Impairment of financial assets
The consolidated entity assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired. Objective evidence includes significant financial difficulty of the issuer or obligor; a breach of contract such as default or delinquency in payments; the lender granting to a borrower concessions due to economic or legal reasons that the lender would not otherwise do; it becomes probable that the borrower will enter bankruptcy or other financial reorganisation; the disappearance of an active market for the financial asset; or observable data indicating that there is a measurable decrease in estimated future cash flows.

The amount of the impairment allowance for financial assets carried at cost is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the current market rate of return for similar financial assets.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies (continued)

Available-for-sale financial assets are considered impaired when there has been a significant or prolonged decline in value below initial cost. Subsequent increments in value are recognised in other comprehensive income through the available-for-sale reserve.

Investment properties
Investment properties principally comprise of freehold land and buildings held for long-term rental and capital appreciation that are not occupied by the consolidated entity. Investment properties are initially recognised at cost, including transaction costs, and are subsequently remeasured annually at fair value. Movements in fair value are recognised directly to profit or loss.

Investment properties are derecognised when disposed of or when there is no future economic benefit expected.

Transfers to and from investment properties to property, plant and equipment are determined by a change in use of owner-occupation. The fair value on the date of change of use from investment properties to property, plant and equipment are used as deemed cost for the subsequent accounting. The existing carrying amount of property, plant and equipment is used for the subsequent accounting cost of investment properties on the date of change of use.

Investment properties also include properties under construction for future use as investment properties. These are carried at fair value, or at cost where fair value cannot be reliably determined and the construction is incomplete.

Property, plant and equipment
Land and buildings are shown at fair value, based on periodic, at least every 3 years, valuations by external independent valuers, less subsequent depreciation and impairment for buildings. The valuations are undertaken more frequently if there is a material change in the fair value relative to the carrying amount. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Increases in the carrying amounts arising on revaluation of land and buildings are credited in other comprehensive income through to the revaluation surplus reserve in equity. Any revaluation decrements are initially taken in other comprehensive income through to the revaluation surplus reserve to the extent of any previous revaluation surplus of the same asset. Thereafter the decrements are taken to profit or loss.

Plant and equipment is stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation is calculated on a straight-line basis to write off the net cost of each item of property, plant and equipment (excluding land) over their expected useful lives as follows:

Buildings	40 years
Leasehold improvements	3-10 years
Plant and equipment	3-7 years
Plant and equipment under lease	2-5 years

The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

Leasehold improvements and plant and equipment under lease are depreciated over the unexpired period of the lease or the estimated useful life of the assets, whichever is shorter.

An item of property, plant and equipment is derecognised upon disposal or when there is no future economic benefit to the consolidated entity. Gains and losses between the carrying amount and the disposal proceeds are taken to profit or loss. Any revaluation surplus reserve relating to the item disposed of is transferred directly to retained profits.

Leases
The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

A distinction is made between finance leases, which effectively transfer from the lessor to the lessee substantially all the risks and benefits incidental to the ownership of leased assets, and operating leases, under which the lessor effectively retains substantially all such risks and benefits.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies (continued)

Finance leases are capitalised. A lease asset and liability are established at the fair value of the leased assets, or if lower, the present value of minimum lease payments. Lease payments are allocated between the principal component of the lease liability and the finance costs, so as to achieve a constant rate of interest on the remaining balance of the liability.

Leased assets acquired under a finance lease are depreciated over the asset's useful life or over the shorter of the asset's useful life and the lease term if there is no reasonable certainty that the consolidated entity will obtain ownership at the end of the lease term.

Operating lease payments, net of any incentives received from the lessor, are charged to profit or loss on a straight-line basis over the term of the lease.

Intangible assets
Intangible assets acquired as part of a business combination, other than goodwill, are initially measured at their fair value at the date of the acquisition. Intangible assets acquired separately are initially recognised at cost. Indefinite life intangible assets are not amortised and are subsequently measured at cost less any impairment. Finite life intangible assets are subsequently measured at cost less amortisation and any impairment. The gains or losses recognised in profit or loss arising from the derecognition of intangible assets are measured as the difference between net disposal proceeds and the carrying amount of the intangible asset. The method and useful lives of finite life intangible assets are reviewed annually. Changes in the expected pattern of consumption or useful life are accounted for prospectively by changing the amortisation method or period.

Goodwill
Goodwill arises on the acquisition of a business. Goodwill is not amortised. Instead, goodwill is tested annually for impairment, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Impairment losses on goodwill are taken to profit or loss and are not subsequently reversed.

Research and development
Research costs are expensed in the period in which they are incurred. Development costs are capitalised when it is probable that the project will be a success considering its commercial and technical feasibility; the consolidated entity is able to use or sell the asset; the consolidated entity has sufficient resources; and intent to complete the development and its costs can be measured reliably. Capitalised development costs are amortised on a straight-line basis over the period of their expected benefit, being their finite life of 10 years.

Patents and trademarks
Significant costs associated with patents and trademarks are deferred and amortised on a straight-line basis over the period of their expected benefit, being their finite life of 10 years.

Customer contracts
Customer contracts acquired in a business combination are amortised on a straight-line basis over the period of their expected benefit, being their finite life of 5 years.

Software
Significant costs associated with software are deferred and amortised on a straight-line basis over the period of their expected benefit, being their finite life of 5 years.

Impairment of non-financial assets
Goodwill and other intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Recoverable amount is the higher of an asset's fair value less costs of disposal and value-in-use. The value-in-use is the present value of the estimated future cash flows relating to the asset using a pre-tax discount rate specific to the asset or cash-generating unit to which the asset belongs. Assets that do not have independent cash flows are grouped together to form a cash-generating unit.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies (continued)

Trade and other payables
These amounts represent liabilities for goods and services provided to the consolidated entity prior to the end of the financial year and which are unpaid. Due to their short-term nature they are measured at amortised cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

Borrowings
Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

Finance costs
Finance costs attributable to qualifying assets are capitalised as part of the asset. All other finance costs are expensed in the period in which they are incurred.

Provisions
Provisions are recognised when the consolidated entity has a present (legal or constructive) obligation as a result of a past event, it is probable the consolidated entity will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. If the time value of money is material, provisions are discounted using a current pre-tax rate specific to the liability. The increase in the provision resulting from the passage of time is recognised as a finance cost.

Employee benefits

Short-term employee benefits
Liabilities for wages and salaries, including non-monetary benefits, annual leave and long service leave expected to be settled wholly within 12 months of the reporting date are measured at the amounts expected to be paid when the liabilities are settled.

Other long-term employee benefits
The liability for annual leave and long service leave not expected to be settled within 12 months of the reporting date are measured at the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on corporate bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

Defined contribution superannuation expense
Contributions to defined contribution superannuation plans are expensed in the period in which they are incurred.

Share-based payments
Equity-settled and cash-settled share-based compensation benefits are provided to employees.

Equity-settled transactions are awards of shares, or options over shares, that are provided to employees in exchange for the rendering of services. Cash-settled transactions are awards of cash for the exchange of services, where the amount of cash is determined by reference to the share price.

The cost of equity-settled transactions are measured at fair value on grant date. Fair value is independently determined using either the Binomial or Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option, together with non-vesting conditions that do not determine whether the consolidated entity receives the services that entitle the employees to receive payment. No account is taken of any other vesting conditions.

The cost of equity-settled transactions are recognised as an expense with a corresponding increase in equity over the vesting period. The cumulative charge to profit or loss is calculated based on the grant date fair value of the award, the best estimate of the number of awards that are likely to vest and the expired portion of the vesting period. The amount recognised in profit or loss for the period is the cumulative amount calculated at each reporting date less amounts already recognised in previous periods.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies (continued)

The cost of cash-settled transactions is initially, and at each reporting date until vested, determined by applying either the Binomial or Black-Scholes option pricing model, taking into consideration the terms and conditions on which the award was granted. The cumulative charge to profit or loss until settlement of the liability is calculated as follows:

- during the vesting period, the liability at each reporting date is the fair value of the award at that date multiplied by the expired portion of the vesting period.
- from the end of the vesting period until settlement of the award, the liability is the full fair value of the liability at the reporting date.

All changes in the liability are recognised in profit or loss. The ultimate cost of cash-settled transactions is the cash paid to settle the liability.

Market conditions are taken into consideration in determining fair value. Therefore any awards subject to market conditions are considered to vest irrespective of whether or not that market condition has been met, provided all other conditions are satisfied.

If equity-settled awards are modified, as a minimum an expense is recognised as if the modification has not been made. An additional expense is recognised, over the remaining vesting period, for any modification that increases the total fair value of the share-based compensation benefit as at the date of modification.

If the non-vesting condition is within the control of the consolidated entity or employee, the failure to satisfy the condition is treated as a cancellation. If the condition is not within the control of the consolidated entity or employee and is not satisfied during the vesting period, any remaining expense for the award is recognised over the remaining vesting period, unless the award is forfeited.

If equity-settled awards are cancelled, it is treated as if it has vested on the date of cancellation, and any remaining expense is recognised immediately. If a new replacement award is substituted for the cancelled award, the cancelled and new award is treated as if they were a modification.

Fair value measurement
When an asset or liability, financial or non-financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Assets and liabilities measured at fair value are classified, into three levels, using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. Classifications are reviewed at each reporting date and transfers between levels are determined based on a reassessment of the lowest level of input that is significant to the fair value measurement.

For recurring and non-recurring fair value measurements, external valuers may be used when internal expertise is either not available or when the valuation is deemed to be significant. External valuers are selected based on market knowledge and reputation. Where there is a significant change in fair value of an asset or liability from one period to another, an analysis is undertaken, which includes a verification of the major inputs applied in the latest valuation and a comparison, where applicable, with external sources of data.

Issued capital
Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Dividends
Dividends are recognised when declared during the financial year and no longer at the discretion of the company.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies (continued)

Business combinations
The acquisition method of accounting is used to account for business combinations regardless of whether equity instruments or other assets are acquired.

The consideration transferred is the sum of the acquisition-date fair values of the assets transferred, equity instruments issued or liabilities incurred by the acquirer to former owners of the acquiree and the amount of any non-controlling interest in the acquiree. For each business combination, the non-controlling interest in the acquiree is measured at either fair value or at the proportionate share of the acquiree's identifiable net assets. All acquisition costs are expensed as incurred to profit or loss.

On the acquisition of a business, the consolidated entity assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic conditions, the consolidated entity's operating or accounting policies and other pertinent conditions in existence at the acquisition-date.

Where the business combination is achieved in stages, the consolidated entity remeasures its previously held equity interest in the acquiree at the acquisition-date fair value and the difference between the fair value and the previous carrying amount is recognised in profit or loss.

Contingent consideration to be transferred by the acquirer is recognised at the acquisition-date fair value. Subsequent changes in the fair value of the contingent consideration classified as an asset or liability is recognised in profit or loss. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity.

The difference between the acquisition-date fair value of assets acquired, liabilities assumed and any non-controlling interest in the acquiree and the fair value of the consideration transferred and the fair value of any pre-existing investment in the acquiree is recognised as goodwill. If the consideration transferred and the pre-existing fair value is less than the fair value of the identifiable net assets acquired, being a bargain purchase to the acquirer, the difference is recognised as a gain directly in profit or loss by the acquirer on the acquisition-date, but only after a reassessment of the identification and measurement of the net assets acquired, the non-controlling interest in the acquiree, if any, the consideration transferred and the acquirer's previously held equity interest in the acquirer.

Business combinations are initially accounted for on a provisional basis. The acquirer retrospectively adjusts the provisional amounts recognised and also recognises additional assets or liabilities during the measurement period, based on new information obtained about the facts and circumstances that existed at the acquisition-date. The measurement period ends on either the earlier of (i) 12 months from the date of the acquisition or (ii) when the acquirer receives all the information possible to determine fair value.

Goods and Services Tax ('GST') and other similar taxes
Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

Rounding of amounts
The company is of a kind referred to in Corporations Instrument 2016/191, issued by the Australian Securities and Investments Commission, relating to 'rounding-off'. Amounts in this report have been rounded off in accordance with that Corporations Instrument to the nearest thousand dollars, or in certain cases, the nearest dollar.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 1. Significant accounting policies (continued)

New Accounting Standards and Interpretations not yet mandatory or early adopted
Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the consolidated entity for the annual reporting period ended 31 December 2017. The consolidated entity's assessment of the impact of these new or amended Accounting Standards and Interpretations, most relevant to the consolidated entity, are set out below.

AASB 9 Financial Instruments
This standard is applicable to annual reporting periods beginning on or after 1 January 2018. The standard replaces all previous versions of AASB 9 and completes the project to replace IAS 39 'Financial Instruments: Recognition and Measurement'. AASB 9 introduces new classification and measurement models for financial assets. A financial asset shall be measured at amortised cost, if it is held within a business model whose objective is to hold assets in order to collect contractual cash flows, which arise on specified dates and solely principal and interest. All other financial instrument assets are to be classified and measured at fair value through profit or loss unless the entity makes an irrevocable election on initial recognition to present gains and losses on equity instruments (that are not held-for-trading) in other comprehensive income ('OCI'). For financial liabilities, the standard requires the portion of the change in fair value that relates to the entity's own credit risk to be presented in OCI (unless it would create an accounting mismatch). New simpler hedge accounting requirements are intended to more closely align the accounting treatment with the risk management activities of the entity. New impairment requirements will use an 'expected credit loss' ('ECL') model to recognise an allowance. Impairment will be measured under a 12-month ECL method unless the credit risk on a financial instrument has increased significantly since initial recognition in which case the lifetime ECL method is adopted. The standard introduces additional new disclosures. The consolidated entity will adopt this standard from 1 January 2018 but the impact of its adoption is yet to be assessed by the consolidated entity.

AASB 15 Revenue from Contracts with Customers
This standard is applicable to annual reporting periods beginning on or after 1 January 2018. The standard provides a single standard for revenue recognition. The core principle of the standard is that an entity will recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The standard will require: contracts (either written, verbal or implied) to be identified, together with the separate performance obligations within the contract; determine the transaction price, adjusted for the time value of money excluding credit risk; allocation of the transaction price to the separate performance obligations on a basis of relative stand-alone selling price of each distinct good or service, or estimation approach if no distinct observable prices exist; and recognition of revenue when each performance obligation is satisfied. Credit risk will be presented separately as an expense rather than adjusted to revenue. For goods, the performance obligation would be satisfied when the customer obtains control of the goods. For services, the performance obligation is satisfied when the service has been provided, typically for promises to transfer services to customers. For performance obligations satisfied over time, an entity would select an appropriate measure of progress to determine how much revenue should be recognised as the performance obligation is satisfied. Contracts with customers will be presented in an entity's statement of financial position as a contract liability, a contract asset, or a receivable, depending on the relationship between the entity's performance and the customer's payment. Sufficient quantitative and qualitative disclosure is required to enable users to understand the contracts with customers; the significant judgments made in applying the guidance to those contracts; and any assets recognised from the costs to obtain or fulfil a contract with a customer. The consolidated entity will adopt this standard from 1 January 2018 but the impact of its adoption is yet to be assessed by the consolidated entity.

IFRS SYSTEM Sample Limited
Notes to the financial statements

Note 1. Significant accounting policies (continued)

AASB 16 Leases
This standard is applicable to annual reporting periods beginning on or after 1 January 2019. The standard replaces AASB 117 'Leases' and for lessees will eliminate the classifications of operating leases and finance leases. Subject to exceptions, a 'right-of-use' asset will be capitalised in the statement of financial position, measured at the present value of the unavoidable future lease payments to be made over the lease term. The exceptions relate to short-term leases of 12 months or less and leases of low-value assets (such as personal computers and small office furniture) where an accounting policy choice exists whereby either a 'right-of-use' asset is recognised or lease payments are expensed to profit or loss as incurred. A liability corresponding to the capitalised lease will also be recognised, adjusted for lease prepayments, lease incentives received, initial direct costs incurred and an estimate of any future restoration, removal or dismantling costs. Straight-line operating lease expense recognition will be replaced with a depreciation charge for the leased asset (included in operating costs) and an interest expense on the recognised lease liability (included in finance costs). In the earlier periods of the lease, the expenses associated with the lease under AASB 16 will be higher when compared to lease expenses under AASB 117. However EBITDA (Earnings Before Interest, Tax, Depreciation and Amortisation) results will be improved as the operating expense is replaced by interest expense and depreciation in profit or loss under AASB 16. For classification within the statement of cash flows, the lease payments will be separated into both a principal (financing activities) and interest (either operating or financing activities) component. For lessor accounting, the standard does not substantially change how a lessor accounts for leases. The consolidated entity will adopt this standard from 1 January 2019 but the impact of its adoption is yet to be assessed by the consolidated entity.

Note 2. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

Share-based payment transactions
The consolidated entity measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either the Binomial or Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

Provision for impairment of receivables
The provision for impairment of receivables assessment requires a degree of estimation and judgement. The level of provision is assessed by taking into account the recent sales experience, the ageing of receivables, historical collection rates and specific knowledge of the individual debtor's financial position.

Provision for impairment of inventories
The provision for impairment of inventories assessment requires a degree of estimation and judgement. The level of the provision is assessed by taking into account the recent sales experience, the ageing of inventories and other factors that affect inventory obsolescence.

Fair value measurement hierarchy
The consolidated entity is required to classify all assets and liabilities, measured at fair value, using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being: Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date; Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and Level 3: Unobservable inputs for the asset or liability. Considerable judgement is required to determine what is significant to fair value and therefore which category the asset or liability is placed in can be subjective.

The fair value of assets and liabilities classified as level 3 is determined by the use of valuation models. These include discounted cash flow analysis or the use of observable inputs that require significant adjustments based on unobservable inputs.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 2. Critical accounting judgements, estimates and assumptions (continued)

Estimation of useful lives of assets
The consolidated entity determines the estimated useful lives and related depreciation and amortisation charges for its property, plant and equipment and finite life intangible assets. The useful lives could change significantly as a result of technical innovations or some other event. The depreciation and amortisation charge will increase where the useful lives are less than previously estimated lives, or technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

Goodwill and other indefinite life intangible assets
The consolidated entity tests annually, or more frequently if events or changes in circumstances indicate impairment, whether goodwill and other indefinite life intangible assets have suffered any impairment, in accordance with the accounting policy stated in note 1. The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations require the use of assumptions, including estimated discount rates based on the current cost of capital and growth rates of the estimated future cash flows.

Impairment of non-financial assets other than goodwill and other indefinite life intangible assets
The consolidated entity assesses impairment of non-financial assets other than goodwill and other indefinite life intangible assets at each reporting date by evaluating conditions specific to the consolidated entity and to the particular asset that may lead to impairment. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves fair value less costs of disposal or value-in-use calculations, which incorporate a number of key estimates and assumptions.

Income tax
The consolidated entity is subject to income taxes in the jurisdictions in which it operates. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The consolidated entity recognises liabilities for anticipated tax audit issues based on the consolidated entity's current understanding of the tax law. Where the final tax outcome of these matters is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is made.

Recovery of deferred tax assets
Deferred tax assets are recognised for deductible temporary differences only if the consolidated entity considers it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Employee benefits provision
As discussed in note 1, the liability for employee benefits expected to be settled more than 12 months from the reporting date are recognised and measured at the present value of the estimated future cash flows to be made in respect of all employees at the reporting date. In determining the present value of the liability, estimates of attrition rates and pay increases through promotion and inflation have been taken into account.

Lease make good provision
A provision has been made for the present value of anticipated costs for future restoration of leased premises. The provision includes future cost estimates associated with closure of the premises. The calculation of this provision requires assumptions such as application of closure dates and cost estimates. The provision recognised for each site is periodically reviewed and updated based on the facts and circumstances available at the time. Changes to the estimated future costs for sites are recognised in the statement of financial position by adjusting the asset and the provision. Reductions in the provision that exceed the carrying amount of the asset will be recognised in profit or loss.

Warranty provision
In determining the level of provision required for warranties the consolidated entity has made judgements in respect of the expected performance of the products, the number of customers who will actually claim under the warranty and how often, and the costs of fulfilling the conditions of the warranty. The provision is based on estimates made from historical warranty data associated with similar products and services.

Business combinations
As discussed in note 1, business combinations are initially accounted for on a provisional basis. The fair value of assets acquired, liabilities and contingent liabilities assumed are initially estimated by the consolidated entity taking into consideration all available information at the reporting date. Fair value adjustments on the finalisation of the business combination accounting is retrospective, where applicable, to the period the combination occurred and may have an impact on the assets and liabilities, depreciation and amortisation reported.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 19. Non-current assets - intangibles (continued)

Reconciliations
Reconciliations of the written down values at the beginning and end of the current and previous financial year are set out below:

Consolidated	Goodwill $'000	Development $'000	Patents and trademarks $'000	Customer contracts $'000	Software $'000	Total $'000
Balance at 1 January 2016	9,500	2,245	160	-	86	11,991
Amortisation expense	-	(321)	(32)	-	(22)	(375)
Balance at 31 December 2016	9,500	1,924	128	-	64	11,616
Additions through business combinations (note 48)	408	-	-	1,250	-	1,658
Impairment of assets	(500)	-	-	-	-	(500)
Amortisation expense	-	(321)	(32)	(229)	(22)	(604)
Balance at 31 December 2017	9,408	1,603	96	1,021	42	12,170

Impairment testing
Goodwill acquired through business combinations have been allocated to the following cash-generating units:

	Consolidated 2017 $'000	Consolidated 2016 $'000
Computer retailing	8,700	9,200
Computer distribution	708	300
	9,408	9,500

The recoverable amount of the consolidated entity's goodwill has been determined by a value-in-use calculation using a discounted cash flow model, based on a 2 year projection period approved by management and extrapolated for a further 3 years using a steady rate, together with a terminal value.

Key assumptions are those to which the recoverable amount of an asset or cash-generating units is most sensitive.

The following key assumptions were used in the discounted cash flow model for the computer retailing division:
(a) 18% (2016: 18%) pre-tax discount rate;
(b) 2% (2016: 5%) per annum projected revenue growth rate;
(c) 5% (2016: 8%) per annum increase in operating costs and overheads.

The discount rate of 18% pre-tax reflects management's estimate of the time value of money and the consolidated entity's weighted average cost of capital adjusted for the computer retailing division, the risk free rate and the volatility of the share price relative to market movements.

Management believes the projected 2% revenue growth rate is prudent and justified, based on the general slowing in the market.

Compared to prior years, management have reduced their estimation of the increase in operating costs and overheads, due to the lower inflation rate and also an effort by the consolidated entity to contain costs.

There were no other key assumptions for the computer retailing division.

Based on the above, an impairment charge of $500,000 has been applied as the carrying amount of goodwill exceeded its recoverable amount for the computer retailing division.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 19. Non-current assets - intangibles (continued)

The following key assumptions were used in the discounted cash flow model for the computer distribution division:
(a) 17% (2016: 18%) pre-tax discount rate;
(b) 5% (2016: 5%) per annum projected revenue growth rate.

The discount rate of 17% pre-tax reflects management's estimate of the time value of money and the consolidated entity's weighted average cost of capital adjusted for the computer distribution division, the risk free rate and the volatility of the share price relative to market movements.

Management have estimated a 5% growth in accordance with the acquisition strategy and have no reason to revise this estimation based on current performance.

There were no other key assumptions for the computer distribution division.

Based on the above, the recoverable amount of the computer distribution division exceeded the carrying amount by $1,250,000.

Sensitivity
As disclosed in note 2, the directors have made judgements and estimates in respect of impairment testing of goodwill. Should these judgements and estimates not occur the resulting goodwill carrying amount may decrease. The sensitivities are as follows:
(a) Revenue would need to decrease by more than 1% for the computer distribution division before goodwill would need to be impaired, with all other assumptions remaining constant.
(b) The discount rate would be required to increase by 1% for the computer distribution division before goodwill would need to be impaired, with all other assumptions remaining constant.

Management believes that other reasonable changes in the key assumptions on which the recoverable amount of computer distribution division's goodwill is based would not cause the cash-generating unit's carrying amount to exceed its recoverable amount.

If there are any negative changes in the key assumptions on which the recoverable amount of goodwill is based, this would result in a further impairment charge for the computer retailing division's goodwill.

Note 23. Current liabilities - borrowings

	Consolidated 2017 $'000	Consolidated 2016 $'000
Bank overdraft	-	1,273
Bank loans	4,500	2,000
Lease liability	1,614	1,337
	6,114	4,610

Refer to note 30 for further information on assets pledged as security and financing arrangements.

Refer to note 39 for further information on financial instruments.

Note 24. Current liabilities - derivative financial instruments

	Consolidated 2017 $'000	Consolidated 2016 $'000
Forward foreign exchange contracts - cash flow hedges	122	107

Refer to note 39 for further information on financial instruments.

Refer to note 40 for further information on fair value measurement.

Note 25. Current liabilities - income tax

	Consolidated 2017 $'000	Consolidated 2016 $'000
Provision for income tax	6,701	2,351

Note 26. Current liabilities - employee benefits

	Consolidated 2017 $'000	Consolidated 2016 $'000
Employee benefits	8,352	8,143

Amounts not expected to be settled within the next 12 months
The current provision for employee benefits includes all unconditional entitlements where employees have completed the required period of service and also those where employees are entitled to pro-rata payments in certain circumstances. The entire amount is presented as current, since the consolidated entity does not have an unconditional right to defer settlement. However, based on past experience, the consolidated entity does not expect all employees to take the full amount of accrued leave or require payment within the next 12 months.

The following amounts reflect leave that is not expected to be taken within the next 12 months:

	Consolidated 2017 $'000	Consolidated 2016 $'000
Employee benefits obligation expected to be settled after 12 months	1,603	1,292

IFRS SYSTEM Sample Limited
Notes to the financial statements

Note 27. Current liabilities - provisions

	Consolidated 2017 $'000	2016 $'000
Lease make good	230	-
Legal claims	60	-
Warranties	3,204	2,837
	3,494	2,837

Lease make good
The provision represents the present value of the estimated costs to make good the premises leased by the consolidated entity at the end of the respective lease terms.

Legal claims
The provision represents a claim by a customer of the computer retailing division. This claim is expected to be settled in the next financial year and the outcome of this claim is not expected to exceed the amount provided for, based on independent legal advice.

Warranties
The provision represents the estimated warranty claims in respect of products sold which are still under warranty at the reporting date. The provision is estimated based on historical warranty claim information, sales levels and any recent trends that may suggest future claims could differ from historical amounts.

Movements in provisions
Movements in each class of provision during the current financial year, other than employee benefits, are set out below:

Consolidated - 2017	Lease make good $'000	Legal claims $'000	Warranties $'000
Carrying amount at the start of the year	-	-	2,837
Additional provisions recognised	-	60	503
Amounts transferred from non-current	230	-	-
Amounts used	-	-	(91)
Unused amounts reversed	-	-	(45)
Carrying amount at the end of the year	230	60	3,204

Note 28. Current liabilities - other

	Consolidated 2017 $'000	2016 $'000
Accrued expenses	2,619	2,065
Revenue received in advance	793	997
	3,412	3,062

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 29. Current liabilities - liabilities directly associated with assets classified as held for sale

	Consolidated 2017 $'000	2016 $'000
Bank loans	4,000	-

The liabilities identified above represents the bank loan secured over the vacant land currently for sale. Refer to note 13 for further information.

Note 30. Non-current liabilities - borrowings

	Consolidated 2017 $'000	2016 $'000
Bank loans	19,000	19,000
Lease liability	1,823	3,437
	20,823	22,437

Refer to note 39 for further information on financial instruments.

Total secured liabilities
The total secured liabilities (current and non-current) are as follows:

	Consolidated 2017 $'000	2016 $'000
Bank overdraft	-	1,273
Bank loans	27,500	21,000
Lease liability	3,437	4,774
	30,937	27,047

Assets pledged as security
The bank overdraft and loans are secured by first mortgages over the consolidated entity's land and buildings.

The lease liabilities are effectively secured as the rights to the leased assets, recognised in the statement of financial position, revert to the lessor in the event of default.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 34. Equity - issued capital (continued)

Ordinary shares
Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the company does not have a limited amount of authorised capital.

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

Capital risk management
The consolidated entity's objectives when managing capital is to safeguard its ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital.

Capital is regarded as total equity, as recognised in the statement of financial position, plus net debt. Net debt is calculated as total borrowings less cash and cash equivalents.

In order to maintain or adjust the capital structure, the consolidated entity may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The consolidated entity is subject to certain financing arrangements covenants and meeting these is given priority in all capital risk management decisions. There have been no events of default on the financing arrangements during the financial year.

The capital risk management policy remains unchanged from the 31 December 2016 Annual Report.

Note 35. Equity - reserves

	Consolidated	
	2017	**2016**
	$'000	**$'000**
Revaluation surplus reserve	4,095	4,095
Available-for-sale reserve	35	-
Foreign currency reserve	(769)	(512)
Hedging reserve - cash flow hedges	(85)	(75)
	3,276	3,508

Revaluation surplus reserve
The reserve is used to recognise increments and decrements in the fair value of land and buildings, excluding investment properties.

Available-for-sale reserve
The reserve is used to recognise increments and decrements in the fair value of available-for-sale financial assets.

Foreign currency reserve
The reserve is used to recognise exchange differences arising from the translation of the financial statements of foreign operations to Australian dollars. It is also used to recognise gains and losses on hedges of the net investments in foreign operations.

Hedging reserve - cash flow hedges
The reserve is used to recognise the effective portion of the gain or loss of cash flow hedge instruments that is determined to be an effective hedge.

IFRS SYSTEM Sample Limited

Note 35. Equity - reserves (continued)

Movements in reserves
Movements in each class of reserve during the current and previous financial year are set out below:

Consolidated	Revaluation surplus $'000	Available-for-sale $'000	Foreign currency $'000	Hedging $'000	Total $'000
Balance at 1 January 2016	2,835	-	(294)	(48)	2,493
Revaluation - gross	1,800	-	-	(38)	1,762
Deferred tax	(540)	-	-	11	(529)
Foreign currency translation	-	-	(218)	-	(218)
Balance at 31 December 2016	4,095	-	(512)	(75)	3,508
Revaluation - gross	-	50	-	(15)	35
Deferred tax	-	(15)	-	5	(10)
Foreign currency translation	-	-	(257)	-	(257)
Balance at 31 December 2017	4,095	35	(769)	(85)	3,276

Note 36. Equity - retained profits

	Consolidated 2017 $'000	**Consolidated 2016 $'000**
Retained profits at the beginning of the financial year	19,314	15,310
Profit after income tax expense for the year	32,408	21,620
Dividends paid (note 38)	(29,383)	(17,616)
Retained profits at the end of the financial year	22,339	19,314

Note 37. Equity - non-controlling interest

	Consolidated 2017 $'000	**Consolidated 2016 $'000**
Issued capital	16,000	16,000
Reserves	455	455
Retained profits	908	766
	17,363	17,221

The non-controlling interest has a 10% (2016: 10%) equity holding in Coman Pty Limited.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 38. Equity - dividends

Dividends
Dividends paid during the financial year were as follows:

	Consolidated	
	2017 $'000	2016 $'000
Final dividend for the year ended 31 December 2016 (2016: 31 December 2015) of 15 cents (2016: 8 cents) per ordinary share	22,037	11,744
Interim dividend for the year ended 31 December 2017 (2016: 31 December 2016) of 5 cents (2016: 4 cents) per ordinary share	7,346	5,872
	29,383	17,616

On [date] the directors declared a final dividend for the year ended 31 December 2017 of 17 cents per ordinary share to be paid on [date], a total estimated distribution of $24,975,000 based on the number of ordinary shares on issue as at [date]. As the dividend was fully franked, there are no income tax consequences for the owners of IFRS SYSTEM Sample Limited relating to this dividend.

Franking credits

	Consolidated	
	2017 $'000	2016 $'000
Franking credits available for subsequent financial years based on a tax rate of 30%	11,520	10,621

The above amounts represent the balance of the franking account as at the end of the financial year, adjusted for:
- franking credits that will arise from the payment of the amount of the provision for income tax at the reporting date
- franking debits that will arise from the payment of dividends recognised as a liability at the reporting date
- franking credits that will arise from the receipt of dividends recognised as receivables at the reporting date

Note 39. Financial instruments

Financial risk management objectives
The consolidated entity's activities expose it to a variety of financial risks: market risk (including foreign currency risk, price risk and interest rate risk), credit risk and liquidity risk. The consolidated entity's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the consolidated entity. The consolidated entity uses derivative financial instruments such as forward foreign exchange contracts to hedge certain risk exposures. Derivatives are exclusively used for hedging purposes, i.e. not as trading or other speculative instruments. The consolidated entity uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate, foreign exchange and other price risks, ageing analysis for credit risk and beta analysis in respect of investment portfolios to determine market risk.

Risk management is carried out by senior finance executives ('finance') under policies approved by the Board of Directors ('the Board'). These policies include identification and analysis of the risk exposure of the consolidated entity and appropriate procedures, controls and risk limits. Finance identifies, evaluates and hedges financial risks within the consolidated entity's operating units. Finance reports to the Board on a monthly basis.

Market risk

Foreign currency risk
The consolidated entity undertakes certain transactions denominated in foreign currency and is exposed to foreign currency risk through foreign exchange rate fluctuations.

Foreign exchange risk arises from future commercial transactions and recognised financial assets and financial liabilities denominated in a currency that is not the entity's functional currency. The risk is measured using sensitivity analysis and cash flow forecasting.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 39. Financial instruments (continued)

In order to protect against exchange rate movements, the consolidated entity has entered into forward foreign exchange contracts. These contracts are hedging highly probable forecasted cash flows for the ensuing financial year. Management has a risk management policy to hedge between 30% and 80% of anticipated foreign currency transactions for the subsequent 4 months.

The maturity, settlement amounts and the average contractual exchange rates of the consolidated entity's outstanding forward foreign exchange contracts at the reporting date were as follows:

	Sell Australian dollars		Average exchange rates	
	2017 $'000	2016 $'000	2017	2016
Buy US dollars				
Maturity:				
0 - 3 months	121	89	0.9123	0.8132
3 - 6 months	34	23	0.9057	0.8294
Buy Euros				
Maturity:				
0 - 3 months	274	207	0.6342	0.5861
3 - 6 months	86	49	0.6355	0.6082
Buy New Zealand dollars				
Maturity:				
0 - 3 months	182	163	1.2345	1.2643
3 - 6 months	107	71	1.2407	1.2847

The carrying amount of the consolidated entity's foreign currency denominated financial assets and financial liabilities at the reporting date were as follows:

	Assets		Liabilities	
Consolidated	2017 $'000	2016 $'000	2017 $'000	2016 $'000
US dollars	35	18	64	69
Euros	7	21	82	74
New Zealand dollars	45	32	61	52
	87	71	207	195

The consolidated entity had net liabilities denominated in foreign currencies of $120,000 (assets of $87,000 less liabilities of $207,000) as at 31 December 2017 (2016: $124,000 (assets of $71,000 less liabilities of $195,000)). Based on this exposure, had the Australian dollar weakened by 10%/strengthened by 5% (2016: weakened by 5%/strengthened by 5%) against these foreign currencies with all other variables held constant, the consolidated entity's profit before tax for the year would have been $12,000 lower/$6,000 higher (2016: $6,000 lower/$6,000 higher) and equity would have been $8,000 lower/$4,000 higher (2016: $4,000 lower/$4,000 higher). The percentage change is the expected overall volatility of the significant currencies, which is based on management's assessment of reasonable possible fluctuations taking into consideration movements over the last 6 months each year and the spot rate at each reporting date. The actual foreign exchange loss for the year ended 31 December 2017 was $13,000 (2016: loss of $6,000).

Price risk
The consolidated entity is not exposed to any significant price risk.

Interest rate risk
The consolidated entity's main interest rate risk arises from long-term borrowings. Borrowings obtained at variable rates expose the consolidated entity to interest rate risk. Borrowings obtained at fixed rates expose the consolidated entity to fair value risk. The policy is to maintain approximately 60% of current borrowings at fixed rates using interest rate swaps to achieve this when necessary.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 39. Financial instruments (continued)

The consolidated entity's bank loans outstanding, totalling $27,500,000 (2016: $21,000,000), are principal and interest payment loans. Monthly cash outlays of approximately $180,000 (2016: $140,000) per month are required to service the interest payments. An official increase/decrease in interest rates of 100 (2016: 100) basis points would have an adverse/favourable effect on profit before tax of $275,000 (2016: $210,000) per annum. The percentage change is based on the expected volatility of interest rates using market data and analysts forecasts. In addition, minimum principal repayments of $8,500,000 (2016: $2,000,000) are due during the year ending 31 December 2018 (2016: 31 December 2017).

Credit risk
Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the consolidated entity. The consolidated entity has a strict code of credit, including obtaining agency credit information, confirming references and setting appropriate credit limits. The consolidated entity obtains guarantees where appropriate to mitigate credit risk. The maximum exposure to credit risk at the reporting date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the statement of financial position and notes to the financial statements. The consolidated entity does not hold any collateral.

The consolidated entity has a credit risk exposure with a major Australian retailer, which as at 31 December 2017 owed the consolidated entity $10,680,000 (76% of trade receivables) (2016: $9,510,000 (74% of trade receivables)). This balance was within its terms of trade and no impairment was made as at 31 December 2017. There are no guarantees against this receivable but management closely monitors the receivable balance on a monthly basis and is in regular contact with this customer to mitigate risk.

Liquidity risk
Vigilant liquidity risk management requires the consolidated entity to maintain sufficient liquid assets (mainly cash and cash equivalents) and available borrowing facilities to be able to pay debts as and when they become due and payable.

The consolidated entity manages liquidity risk by maintaining adequate cash reserves and available borrowing facilities by continuously monitoring actual and forecast cash flows and matching the maturity profiles of financial assets and liabilities.

Financing arrangements
Unused borrowing facilities at the reporting date:

	Consolidated	
	2017 $'000	2016 $'000
Bank overdraft	5,000	3,727
Bank loans	12,500	4,000
	17,500	7,727

The bank overdraft facilities may be drawn at any time and may be terminated by the bank without notice. Subject to the continuance of satisfactory credit ratings, the bank loan facilities may be drawn at any time and have an average maturity of 3 years (2016: 4 years).

IFRS SYSTEM Sample Limited
Notes to the financial statements

Derivatives						
Forward foreign exchange contracts net settled	-	107	-	-	-	107
Total derivatives		107	-	-	-	107

The cash flows in the maturity analysis above are not expected to occur significantly earlier than contractually disclosed above.

Fair value of financial instruments
Unless otherwise stated, the carrying amounts of financial instruments reflect their fair value.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 40. Fair value measurement

Fair value hierarchy
The following tables detail the consolidated entity's assets and liabilities, measured or disclosed at fair value, using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being:
Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date
Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
Level 3: Unobservable inputs for the asset or liability

Consolidated - 2017	Level 1 $'000	Level 2 $'000	Level 3 $'000	Total $'000
Assets				
Ordinary shares at fair value through profit or loss	360	-	-	360
Ordinary shares available-for-sale	-	-	170	170

Assets				
Investment properties	-	-	47,500	47,500
Land and buildings	-	-	58,500	58,500
Total assets	-	-	106,000	106,000
Liabilities				
Forward foreign exchange contracts	-	107	-	107
Total liabilities	-	107	-	107

Assets and liabilities held for sale are measured at fair value on a non-recurring basis.

There were no transfers between levels during the financial year.

The carrying amounts of trade and other receivables and trade and other payables are assumed to approximate their fair values due to their short-term nature.

The fair value of financial liabilities is estimated by discounting the remaining contractual maturities at the current market interest rate that is available for similar financial liabilities.

Valuation techniques for fair value measurements categorised within level 2 and level 3
Unquoted investments have been valued using a discounted cash flow model.

The basis of the valuation of investment properties is fair value. The investment properties are revalued annually based on independent assessments by a member of the Australian Property Institute having recent experience in the location and category of investment property being valued. Valuations are based on current prices in an active market for similar properties of the same location and condition, subject to similar leases and takes into consideration occupancy rates and returns on investment.

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 40. Fair value measurement (continued)

The basis of the valuation of land and buildings is fair value. The land and buildings were last revalued on 31 December 2016 based on independent assessments by a member of the Australian Property Institute having recent experience in the location and category of land and buildings being valued. The directors do not believe that there has been a material movement in fair value since the revaluation date. Valuations are based on current prices for similar properties in the same location and condition.

Derivative financial instruments have been valued using quoted market rates. This valuation technique maximises the use of observable market data where it is available and relies as little as possible on entity specific estimates.

Level 3 assets and liabilities
Movements in level 3 assets and liabilities during the current and previous financial year are set out below:

Consolidated	Available-for-sale $'000	Investment properties $'000	Land and buildings $'000	Total $'000
Balance at 1 January 2016	-	46,000	56,500	102,500
Gains recognised in profit or loss	-	1,500	-	1,500
Gains recognised in other comprehensive income	-	-	2,000	2,000
Balance at 31 December 2016	-	47,500	58,500	106,000
Losses recognised in profit or loss	-	(600)	-	(600)
Gains recognised in other comprehensive income	50	-	-	50
Additions	200	-	-	200
Disposals	(80)	-	-	(80)
Balance at 31 December 2017	170	46,900	58,500	105,570

The level 3 assets and liabilities unobservable inputs and sensitivity are as follows:

Description	Unobservable inputs	Range (weighted average)	Sensitivity
Available-for sale	Growth rate	2.5% to 3.5% (3.0%)	0.25% change would increase/decrease fair value by $5,000
	Discount rate	8.0% to 11.0% (9.5%)	1.00% change would increase/decrease fair value by $14,000
Investment properties	Rental yield	7.5% to 9.0% (8.5%)	0.75% change would increase/decrease fair value by $352,000
	Rental growth	1.25% to 2.0% (1.75%)	0.25% change would increase/decrease fair value by $117,000
	Long-term vacancy rate	5.0% to 9.0% (7.5%)	0.75% change would increase/decrease fair value by $276,000
	Discount rate	4.0% to 6.0% (5.25%)	0.5% change would increase/decrease fair value by $57,000
Land and buildings	Rental yield	6.0% to 8.0% (7.5%)	0.75% change would increase/decrease fair value by $440,000
	Discount rate	5.0% to 7.0% (6.25%)	0.5% change would increase/decrease fair value by $61,000

Audit services - unrelated firms		
Audit of the financial statements	26,500	23,000

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 43. Contingent assets

Coman Pty Limited, a subsidiary, will be paid a success premium of up to $3,000,000 by Compdesign Partnership, in which it holds a 35% interest, if the rights to a computer manufacturing process are sold to a Korean based company. The likelihood of this proceeding is highly probable. No asset has been recognised within these financial statements.

Coman Pty Limited, a subsidiary, has an outstanding insurance claim with respect to inventory that was damaged in the Queensland floods that occurred during the financial year. An assessment is currently being undertaken by the insurer as to whether it was the cause of a flood or rising waters, which will affect the payout. Because the insurance proceeds are not virtually certain, no asset has been recognised within these financial statements. The inventory of approximately $400,000 has been written off during the current financial year.

Note 44. Contingent liabilities

During the financial year there was a work related accident involving a member of staff. Although the investigation is still in progress, the directors are of the opinion, based on independent legal advice, that the consolidated entity will not be found to be at fault and any compensation will be covered by the consolidated entity's insurance policy. Accordingly, no provision has been provided within these financial statements.

The consolidated entity has given bank guarantees as at 31 December 2017 of $3,105,000 (2016: $2,844,000) to various landlords.

Note 45. Commitments

	Consolidated	
	2017 $'000	2016 $'000
Capital commitments		
Committed at the reporting date but not recognised as liabilities, payable:		
Investment properties	170	170
Property, plant and equipment	1,165	1,145
Intangible assets	160	-
Lease commitments - operating		
Committed at the reporting date but not recognised as liabilities, payable:		
Within one year	38,103	35,162
One to five years	168,275	155,287
More than five years	269,683	314,258
	476,061	504,707
Lease commitments - finance		
Committed at the reporting date and recognised as liabilities, payable:		
Within one year	1,841	1,692
One to five years	1,902	3,743
Total commitment	3,743	5,435
Less: Future finance charges	(306)	(661)
Net commitment recognised as liabilities	3,437	4,774
Representing:		
Lease liability - current (note 23)	1,614	1,337
Lease liability - non-current (note 30)	1,823	3,437
	3,437	4,774

IFRS SYSTEM Sample Limited
Notes to the financial statements
31 December 2017

Note 45. Commitments (continued)

Operating lease commitments includes contracted amounts for various retail outlets, warehouses, offices and plant and equipment under non-cancellable operating leases expiring within one to ten years with, in some cases, options to extend. The leases have various escalation clauses. On renewal, the terms of the leases are renegotiated.

Finance lease commitments includes contracted amounts for various plant and equipment with a written down value of $4,114,000 (2016: $5,131,000) secured under finance leases expiring within one to five years. Under the terms of the leases, the consolidated entity has the option to acquire the leased assets for predetermined residual values on the expiry of the leases.

Note 46. Related party transactions

Parent entity
IFRS SYSTEM Sample Limited is the parent entity.

Subsidiaries
Interests in subsidiaries are set out in note 49.

Associates
Interests in associates are set out in note 50.

Key management personnel
Disclosures relating to key management personnel are set out in note 41.

Transactions with related parties
The following transactions occurred with related parties:

	Consolidated	
	2017 $	2016 $
Payment for goods and services:		
Payment for services from associate	3,397,327	3,234,986
Payment for marketing services from BE Promotions Pty Limited (director-related entity of Brad Example)	81,238	67,905

Receivable from and payable to related parties
The following balances are outstanding at the reporting date in relation to transactions with related parties:

	Consolidated	
	2017 $	2016 $
Current payables:		
Trade payables to associate	361,334	345,876
Trade payables to BE Promotions Pty Limited (director-related entity of Brad Example)	7,108	6,388

Loans to/from related parties
There were no loans to or from related parties at the current and previous reporting date.

Terms and conditions
All transactions were made on normal commercial terms and conditions and at market rates.

Total current liabilities	11,173	2,738
Total liabilities	120,535	95,404
Equity		
Issued capital	182,953	182,678
Revaluation surplus reserve	350	350
Available-for-sale reserve	35	-
Hedging reserve - cash flow hedges	(85)	(75)
Retained profits	5,022	4,668
Total equity	188,275	187,621

Guarantees entered into by the parent entity in relation to the debts of its subsidiaries
The parent entity had no guarantees in relation to the debts of its subsidiaries as at [DATE] and [DATE].

Contingent liabilities
The parent entity had no contingent liabilities as at [DATE] and [DATE].

Capital commitments - Property, plant and equipment
The parent entity had no capital commitments for property, plant and equipment as at [DATE] and [DATE].

Significant accounting policies
The accounting policies of the parent entity are consistent with those of the consolidated entity, as disclosed in note 1, except for the following:

- Investments in subsidiaries are accounted for at cost, less any impairment, in the parent entity.
- Investments in associates are accounted for at cost, less any impairment, in the parent entity.
- Dividends received from subsidiaries are recognised as other income by the parent entity and its receipt may be an indicator of an impairment of the investment.

IFRS SYSTEM Sample Limited
Notes to the financial statements

Note 48. Business combinations

On [date] Delserve Pty Limited, a subsidiary of IFRS SYSTEM Sample Limited, acquired 100% of the ordinary shares of CompCarrier Pty Limited (formerly known as TechCarrier Pty Limited) for the total consideration transferred of $8,230,000. This is a freight business and operates in the computer distribution division of the consolidated entity. It was acquired to better utilise the existing computer distribution division administrative function. The goodwill of $408,000 represents the expected synergies from merging this business with the computer distribution division and eliminating third party freight costs. The acquired business contributed revenues of $5,428,000 and profit after tax of $670,000 to the consolidated entity for the period from [date] to 31 December 2017. If the acquisition occurred on 1 January 2017, the full year contributions would have been revenues of $5,901,000 and profit after tax of $729,000. The values identified in relation to the acquisition of CompCarrier are final as at 31 December 2017.

Details of the acquisition are as follows:

	Fair value $'000
Cash and cash equivalents	3
Trade receivables	822
Prepayments	106
Plant and equipment	6,060
Customer contracts	1,250
Deferred tax asset	449
Trade payables	(364)
Deferred tax liability	(375)
Employee benefits	(129)
Net assets acquired	7,822
Goodwill	408
Acquisition-date fair value of the total consideration transferred	8,230
Representing:	
Cash paid or payable to vendor	8,230
Acquisition costs expensed to profit or loss	182
Cash used to acquire business, net of cash acquired:	
Acquisition-date fair value of the total consideration transferred	8,230
Less: cash and cash equivalents	(3)
Less: payments made in prior periods	(155)
Net cash used	8,072

The fair value of trade receivables is $822,000. The gross contractual amount for trade receivables due is $874,000, of which $52,000 is not expected to be collected.

Note 51. Deed of cross guarantee

The following entities are party to a deed of cross guarantee under which each company guarantees the debts of the others:

IFRS SYSTEM Sample Limited
Retsold Pty Limited
Delserve Pty Limited
CompCarrier Pty Limited

By entering into the deed, the wholly-owned entities have been relieved from the requirement to prepare financial statements and directors' report under Corporations Instrument 2016/785 issued by the Australian Securities and Investments Commission.

The above companies represent a 'Closed Group' for the purposes of the Corporations Instrument, and as there are no other parties to the deed of cross guarantee that are controlled by IFRS SYSTEM Sample Limited, they also represent the 'Extended Closed Group'.

Set out below is a consolidated statement of profit or loss and other comprehensive income and statement of financial position of the 'Closed Group'.

Statement of profit or loss and other comprehensive income	2017 $'000	2016 $'000

Note 54. Non-cash investing and financing activities

	Consolidated	
	2017 $'000	2016 $'000
Acquisition of plant and equipment by means of finance leases	-	2,334
Leasehold improvements - lease make good	550	-
Shares issued under employee share plan	250	-
	800	2,334

Note 55. Share-based payments

On [date], 100,000 shares were issued to key management personnel at an issue price of $2.50 per share and a total transactional value of $250,000.

A share option plan has been established by the consolidated entity and approved by shareholders at a general meeting, whereby the consolidated entity may, at the discretion of the Board, grant options over ordinary shares in the company to certain key management personnel of the consolidated entity. The options are issued for nil consideration and are granted in accordance with performance guidelines established by the Board.

Notes to the financial statements
31 December 2017

Note 55. Share-based payments (continued)

Set out below are summaries of options granted under the plan:

2017

Grant date	Expiry date	Exercise price	Balance at the start of the year	Granted	Exercised	Expired/ forfeited/ other	Balance at the end of the year
01/04/2015	31/03/2017	$2.50	10,000	-	(10,000)	-	-
01/04/2017	31/03/2021	$3.00	-	17,500	-	-	17,500
			10,000	17,500	(10,000)	-	17,500
Weighted average exercise price			$2.50	$3.00	$2.50	$0.00	$3.00

2016

Grant date	Expiry date	Exercise price	Balance at the start of the year	Granted	Exercised	Expired/ forfeited/ other	Balance at the end of the year
01/04/2015	31/03/2017	$2.50	10,000	-	-	-	10,000
			10,000	-	-	-	10,000
Weighted average exercise price			$2.50	$0.00	$0.00	$0.00	$2.50

Set out below are the options exercisable at the end of the financial year:

Grant date	Expiry date	2017 Number	2016 Number
01/04/2015	31/03/2017	-	10,000
		-	10,000

The weighted average share price during the financial year was $2.66 (2016: $2.34).

The weighted average remaining contractual life of options outstanding at the end of the financial year was 3.25 years (2016: 0.25 years).

For the options granted during the current financial year, the valuation model inputs used to determine the fair value at the grant date, are as follows:

Grant date	Expiry date	Share price at grant date	Exercise price	Expected volatility	Dividend yield	Risk-free interest rate	Fair value at grant date
01/04/2017	31/03/2021	$2.61	$3.00	18.00%	4.75%	5.93%	$0.489

Directors' declaration
31 December 2017

In the directors' opinion:

- the attached financial statements and notes comply with the Corporations Act 2001, the Accounting Standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements;

- the attached financial statements and notes comply with International Financial Reporting Standards as issued by the International Accounting Standards Board as described in note 1 to the financial statements;

- the attached financial statements and notes give a true and fair view of the consolidated entity's financial position as at 31 December 2017 and of its performance for the financial year ended on that date;

- there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable; and

- at the date of this declaration, there are reasonable grounds to believe that the members of the Extended Closed Group will be able to meet any obligations or liabilities to which they are, or may become, subject by virtue of the deed of cross guarantee described in note 51 to the financial statements.

Signed in accordance with a resolution of directors made pursuant to section 295(5)(a) of the Corporations Act 2001.

On behalf of the directors
